Pediatric Palliative Care Course for Physicians

Aruga sa Batang may Cancer
(ABC) Initiative

UP Open University,
Los Baños, Laguna 4031, Philippines

Course Overview

The Pediatric Palliative Care Course for Physicians will equip learners with detailed and comprehensive information on medical care for pediatric patients with cancer or other diseases requiring palliative or end-of-life care. The course is composed of 24 modules with various topics including family-centered care, grief and bereavement, management of symptoms, and preparing for imminent death.

The course was adapted from the pediatric curriculum of The Education in Palliative and End-of-Life Care (EPEC) Project. To fit the needs of clients and families in the Philippines, the curriculum was modified by different health professionals who are experts in the aspects of medical care, research, and education.

Objectives

This course aims to help the practitioner achieve improved and up-to-date knowledge and skills on pediatric palliative care. It also aims to demonstrate how palliative care can benefit patients and their families, and how it can complement the work of the primary care team.

Target Enrollees

The course is designed for physicians focusing their clinical practice on pediatric oncology and/or palliative care.

Duration

Learners can complete the course for a maximum of three (3) months.
